INTERMEDIATE UPRIGHT

- Height fully adjustable from 850mm up to 1350mm
- Removable top riser unit
- Stainless steel grub screws and clinch nuts for extra durability
- Pre-galvanised steel tube
- Available powder coated to any RAL colour

Our lightweight freestanding edge protection system uses a proven counterbalance design to achieve exceptional stability on all roof surfaces. Because the system is completely freestanding there is no need for drilling or penetration of the roof covering.

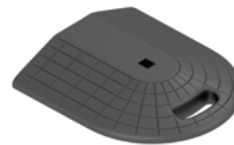

The system is supplied in kit form using modular components which are quickly and easily linked together to form a sturdy, lightweight, and durable collective fall protection system.

Our freestanding system complies to the following legislation:

- BS EN 13374: 2004 Class A
- HSE INDG 284 "Working on roofs"
- HSG33 "Health and safety at work"
- BS6399: Part 2 1995 Wind code

COUNTERBALANCE WEIGHT

- 100% Recycled PVC
- Easy to carry weighing just 17kg
- Will not damage roof surface

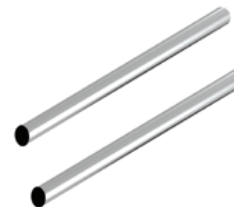

This product is available powder coated to any RAL colour!

CROSS RAILS

- Pre-galvanised steel tube
- Pre-cut to 2.50m lengths
- Lightweight

SIMPLE

System uses minimum number of components for easy installation

VERSATILE

Pre-assembled components allow quick and easy installation

DURABLE

Pre-galvanised tube and stainless steel fittings

LIGHTWEIGHT

Weighing just 15kg per LM the system is easy to lift and move
